

CASE STUDY SCOUR ASSESSMENTS

Extreme weather events and flooding are becoming more commonplace.

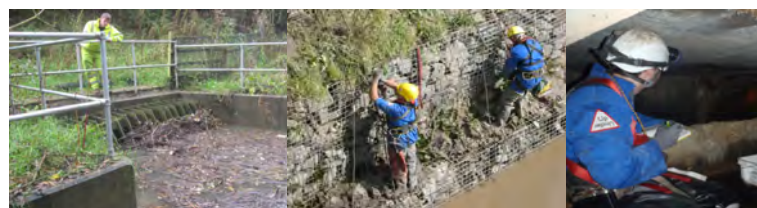

- Are your waterway structures up to the task?
- Are they susceptible to scour?
- Do they have adequate protection measures in place?
- Are you aware of the potential risks?
- Can you afford to ignore these risks?

Bridges - Tunnels - Culverts - Retaining Walls - Slopes

We can give you complete peace of mind:

- Detailed inspection and condition surveys from our experienced inspection engineers
- Assessment of scour at highway structures to BD97/12
- Condition rating, scour risk assessment and asset management planning
- Debris removal, cleaning maintenance and repairs
- Silt and sediment removal - WAC sampling and testing
- Topographical survey above and below ground
