

CASE STUDY SLOPE STABILISATION

Project: A465 Heads of the Valley Road near Abergavenny
Slope stabilisation measures

Up and Under (Specialist Contracts) Ltd. were commissioned to carry out stabilisation measures on the A465 Heads of the Valley Road near Abergavenny, South Wales. The works comprised installation of approximately 700m.sq. of double corrosion protected mesh and remedial works to existing weldmesh netting. Netting and supported cables were secured using 20mm dia. rock-bolts drilled to a depth of 1.5-2.0m. The works were completed using a combination of roped access techniques and powered access platforms utilising lane closures of the carriageway below.
