

## **POLICY ON THE CONSTRUCTION (DESIGN AND MAINTENANCE) REGULATIONS**

In accordance with our statutory obligations under the Construction (Design and Maintenance) Regulations, it is the policy of Group Companies to comply with these regulations and the details within.

Group Companies typically act as a single Contractor within CDM but may act as the Principal Contractor when more than one Contractor is involved in the project. Procedures and guidance are contained within OP34 of the company management system that will be used to manage all works falling within CDM.

Group Companies are committed to providing training and guidance to employees to ensure they can competently undertake the duties required of them within the regulations.

The Up and Under Group has a deeply rooted safety culture and has enjoyed close links with the Health and Safety Executive throughout its history. The safety of all people coming into contact with our activities should be paramount in our preparation, operations and in what we leave behind. This statement carries the full backing of the company top management.
